

A new school. A new way. Make the LEAP!

St. Johns Tech & LEAP Middle School

At St. Johns Tech and LEAP Middle, experience the new way of schooling, where students:

- Gain certifications that help get engaged more quickly in the world of work
- Are immersed in Science, Technology, Engineering and Math
- Learn better in smaller classrooms with lower student-to-teacher ratios
- Are exposed to rigorous, intensive reading programs, where individual strategies are prepared through diagnostics

St. Johns Tech and LEAP Middle aren't for all kids. Students that succeed here:

- Learn through hands-on engagement, not listening to lectures in a classroom
- Appreciate experiential education, where they are part of the projects being developed
- Are more creative and experimental in their approach to learning
- Appreciate having options in their customized learning plan

The Academy of Coastal and Water Resources

Academy students receive industry-relevant curriculum that provides opportunities for success in post-secondary education and careers. Business partners engage students in applied, hands-on learning through understanding of water issues and conservation.

St. Johns Virtual School

Work at your own pace. Study anywhere. Get face-to-face time with teachers. Receive career counseling. No waiting for the right classes. If this sounds like you or someone you know, then the Virtual School is for you.

Did You Know?

- Our students can still participate in extracurricular activities at their zoned school
- Bus transportation is provided to St. Johns Tech and LEAP Middle from everywhere in the county
- Our students explore and learn through field trips, job shadowing and internships with multiple business partners
- In 2011-2012, our students continued to make great progress
